

**MAIN CONTRACTOR: KIZER ENERGY**

**FINAL CLIENT: SANTOS – PIKKA SEA WATER TREATMENT PLANT, ALASKA**

**TIMELINE: 2026**

Prizma Consulting provided advisory and technical expertise in support of the Santos Site Management Team. Prizma Consulting provided its services under a contract with Kizer Energy, an industry leader in Operational Compliance and Readiness.

Prizma Consultant provided advisory and technical support to the Commissioning and Startup Site Management Team. The consultant supported the Santos team during the commissioning and startup of the Pikka Seawater Treatment Plant (STP), at site in Alaska Arctic Sea. The Santos Pikka STP started successfully treating seawater to meet the quality for injection to boost the oil reservoir production.

The consultant services included coordination, supervision and integration of the commissioning contracting company, vendors, and engineering resources. Prizma Consulting provided project engineering, recommendations for process controls changes, Pre Startup Safety Review (PSSR), liaison with Santos Operations to facilitate startup sequences and document the proper settings, timers, and overrides required to dynamically commission and start process systems.
